

QUICK REFERENCE GUIDE

permanent colour

Mixing and Timing

			Timing Normal	Timing with Heat
 Colourwear Permanent	1+1	1 part colour + 1 part Colourwear Crème Peroxide.	30 minutes.	15 minutes.
 Full Throttle Long Lasting Reds	1+1	1 part colour + 1 part Colourwear Crème Peroxide.	30-45 minutes.	15-25 minutes.
 Super Star One-Step Blondes	1+2	1 part colour + 2 parts Colourwear Crème Peroxide.	50-60 minutes.	Not Recommended.
 Pastel Toning Blondes	1+2	1 part colour + 2 parts Permanent Pastel Activator.	Visual up to 15 minutes.	Not Recommended.

* Remember when using heat to let hair cool down prior to rinsing.

Choice of Developer/Peroxide

3%–10vol	Depositing / going darker, ideal when a cool tone is required.
6%–20vol	1 level of lightening, level on level colouring, going darker, grey coverage.
9%–30vol	2 levels of lightening.
12%–40vol	3 levels of lightening.
1.9%–Pastel Activator	Specific for use when toning with Colourwear Permanent.

Grey Coverage

Up to 30% grey	No need to add a natural base shade.
30% to 50% grey	1 part natural base shade to 2 parts target shade.
50% to 100% grey	1 part natural base shade to 1 part target shade.

Resistant Grey Coverage – Coarse / Resistant Hair

Option 1	Extended Processing Time	Extend the processing time from 30 to 45 minutes – this is a good first option.
Option 2	Resistant Mix	30g of Colourwear Natural or Natural Intensive shade + 20g of 6%–20 vol Colourwear Crème Peroxide.

Pre-Softening – Grey Patch / Streak

Always choose a natural base shade 1 shade lighter than target shade. Mix 1 part colour to 1 part water. (Eg. Target level 6/7 pre-soften with 10g 7/0 + 10g water, mix well.) Apply to grey patch/streak, then apply target colour directly over the top and process as normal.

Full Throttle Long Lasting Reds

Designed to deliver long lasting fade resistant results when an intensive fashion red shade is desired. Consultation is recommended as these shades are not easily removed.

- a following the mixing, timing and choice of developer / peroxide instructions as recommended.
- b can be mixed with other PPS Colourwear Shades but NOT to be used with Super Star One-Step Blondes 12 Series.
- c do NOT use as a filler.

Mixing	1+1	30g colour + 30g Colourwear Crème Peroxide 9%–30vol or 12%–40vol.
Removal		Emulsify and rinse using the colour to remove any staining – continue to rinse this range for 5 minutes minimum, make sure the water runs completely clear. NB If this is not done the colour will bleed whenever the hair becomes wet and staining of skin, clothes or linen will occur.
Shampoo		Give 2 thorough shampoos with Colourwear Shampoo.
Conditioning		Towel dry and apply Colourwear Double Fixx, massage thoroughly through the hair.

Permanent Gemstone Concentrates

0/81 0/19 0/28 0/88 0/33 0/43 0/45 0/65 0/66

Permanent Gemstone Concentrates are perfect for unleashing your creativity as a colourist, they can be added to any Colourwear Permanent Shade to intensify or control unwanted warmth.

Shade Level	2	3	4	5	6	7	8	9	10	12
g	4.5g–7.5g	4g–7.5g	3.5g–5g	3g–5g	2.5g	2g	1.5g	1g	0.5g	1g
cm	9cm–15cm	8cm–15cm	7cm–10cm	6cm–10cm	5cm	4cm	3cm	2cm	1cm	2cm

REMEMBER YOU CAN ALWAYS MIX MORE

Ratios are a guide only – texture, density, porosity and length should be considered prior to mixing

We recommend that you carry out a skin sensitivity test 48 hours prior to application of this product. Gloves and an apron should always be worn.

Regrowth Application

- a apply ample amounts of mixture to clean dry regrowth, beginning at the priority areas, eg. where the hair has the highest percentage of grey, or where the highest lift is required.
- b small meshes should be taken quarter by quarter with precise application and no overlapping.
- c follow timing instructions as recommended.

First Time Colour, Virgin Application

- a lighter or brighter target shade – apply mixture to mid-lengths and ends, starting 2–3cm from scalp. When this is complete apply the mixture directly to the 2–3cm root area.
- b depositing / darker target shade – apply mixture from roots straight through to the ends.
- c follow timing instructions as recommended.

Removal & After Care

- a when development is complete, before adding water emulsify colour around the hairline.
- b add warm water and emulsify thoroughly.
- c lightly shampoo with PPS Colourwear Shampoo and rinse thoroughly.
- d to stabilise the colour and rebalance pH levels, apply PPS Colourwear Double Fixx, PPS Colourwear Conditioner or C]4u Colour Addict Conditioner.
